GARANTIAS

1 - No que a garantias diz respeito, as vendas de artigos da marca LIGHTSPACE estão legalmente enquadradas no Decreto Lei 67/2003 de 8 de Abril e respetivas alterações introduzidas pelos Decretos Lei 84/2008 de 21 de Maio 84/2021 de 18 de outubro e outras que venham a ser introduzidas. Por não se aplicar nenhum dos decretos-lei acima citados (de profissional para profissional), enquadram-se no Artigo 921º, nº 2, do Código Civil (Direito das Obrigações) e respetivas alterações que venham a ser introduzidas. Fora do território da Comunidade europeia, cumprem-se as garantias legais de cada país.

2 - Para os casos em que se pretenda fazer uma reclamação de um artigo em garantia (e sempre que este tenha sido alvo de manipulação para ser instalado e ser posto em funcionamento) não poderá ser retirado do local onde foi instalado até visita previamente agendada com o revendedor e ou o representante da marca para que "in loco" possam ser observados todos os detalhes, serem tiradas fotografias quando necessário e ser avaliado o integral cumprimento de todas as regras e normas pelo técnico responsável pela referida instalação.

3 - Não se aceitarão reclamações de artigos que não respeitem o exposto no nº anterior (nº2).

4 - Qualquer alteração introduzida nos artigos sem prévia autorização do fabricante origina a perda da garantia.

5- Garantimos a entrega em qualquer ponto de Portugal Continental ou Espanha em  , salvo rotura de Stock.

RECOMENDAÇÕES DE INSTALAÇÃO: Para a correta aplicação de qualquer encastrável, recomenda-se que exista em obra pelo menos uma peça para que possam ser conferidas as medidas antes da abertura de qualquer buraco. As medidas apresentadas em catálogo podem por vezes pecar por erro. A instalação dos artigos apresentados neste catálogo deverá ser realizada por técnicos qualificados para o efeito, com a máxima precaução e cumprindo sempre as recomendações de instalação e a normativa europeia vigente. No que aos artigos de natal diz respeito, sempre que sejam instalados no exterior é obrigatório a utilização de manga termorestratil em todas as alimentações, uniões, bem como no final do troço instalado.

IMPORTANTE: O PVC utilizado na construção do cordão led , cordão NEON e fitas 230V não é resistente aos raio UV, pelo que é entendido como normal o facto de ir ganhando um tom acastanhado sempre que esteja aplicado ao sol. Neste caso será também normal que se torne rígido sem possibilidade de voltar a ser enrolado e que inclusivamente venha a ganhar fissuras. É também obrigatório a utilização de manga termorestratil em todas as alimentações, uniões, bem como no final do troço instalado.

OUTDOOR: Tanto na instalação inicial como nas intervenções de manutenção deverá ser assegurado que antes do encerramento da luminária, serão eliminados quaisquer resíduos sólidos e ou líquidos do seu interior, assim como de todas as borrachas, vedantes, roscas, buçins e componentes de encerramento. Terá que haver a preocupação de periodicamente ser feita a limpeza da área envolvente e da própria luminária, de forma a evitar que seja "invadida" por ervas, poeiras, fungos e ou insetos. Para a correta instalação de qualquer encastrável de solo, de IP inferior a 68 é obrigatório respeitar as medidas de drenagem apresentadas em catálogo. Deve ser acutelado que fique posicionado de forma a que seja evitado a todo o custo a submersão mesmo que temporária (nunca abaixo do nível do acabamento do chão).

TRANSFORMADORES: A potência dos transformadores deverá ser no mínimo 10% superior à soma da potência das fitas a alimentar. Os potenciômetros visíveis nos transformadores classe I foram calibrados em fábrica, pelo que não é permitido a alteração da sua posição original sob pena de ser alterada a amperagem necessária e danificarem as fitas estando esse dano fora do âmbito da garantia contra feitos de fabrico.

NOTA: Esta tabela poderá ser alterada sem aviso prévio. [Aconselha-se a consulta.](#)
[Aos preços acresce o IVA à taxa legal em vigor.](#)
